About Us

Our organization was created over 25 years ago by nurses who had a particular love for the care of patients with respiratory issues. This organization continues with the mission of better care for respiratory patients as well as professional growth for those caring for them. We recognize that while this started as a nursing organization, it takes a team to care for these patients.

The Respiratory Nursing Society & Interprofessional Collaborative (RNSIC) is a professional association for healthcare providers interested in respiratory health and quality care for those with respiratory disorders. RNSIC provides an opportunity for those in a variety of practice settings to develop a strong respiratory knowledge base and skills important for quality respiratory healthcare.

Continuing Education

This year’s conference will be held in-person. Lectures must be viewed in entirety to be awarded educational contact hours.

This educational conference has been submitted to the Virginia Nurses Association for approval to award contact hours for nurses.

This educational conference has been submitted to the American Association for Respiratory Care for approval to award contact hours for respiratory therapists.

Objectives

To offer healthcare providers current information relevant to the care and support of patients who suffer from respiratory disease.
